FRIENDS TOGETHER

by Tanya Saunders

ISBN: 9781913968069 (paperback) 9781913968076 (hardcover)

Luna Bear is sad because she's on her own and has no-one to play with. Luckily, The Bear Buddies are kind and friendly; they scoop her up and before long, she is one of them!

Introducing the eight Bear Buddies, one of whom wears cochlear implants, FRIENDS TOGETHER is all about making friends in the playground, helping children learn and practice early social language and interpersonal skills. In addition to modelling simple playtime language (and playground behavior) that children will need to make friends and join in, the story demonstrates the importance of inclusivity, acceptance, kindness and diverse friendships.

“I took “Friends Together” home so I could use it as part of the books course and am going to have a hard time getting it back into the office as my daughter asks for it every night. She is nearly two and whilst she doesn't get the whole story, she is using some of the emotional vocab which she learned from the book” - AV Therapist

“I have just read through your three stories. They are lovely! I love the mini story maps, such a good idea. They give an excellent opportunity to think through what has happened and use all the language. I think the variety of participation pages is good. I really like the way you integrate auditory memory into “Lost and Found”. I see these books as a great resource for Teachers of the Deaf, therapists and parents to share and discuss with their children...providing a backbone for lots of rich discussion which you also facilitate in your participation pages. There are so many children who will benefit from your lovely stories.” - AV Therapist
